Enhance efficiency, gain control, and save money with PaperVision®.

Is your current information management application capable of keeping up with your organization's growing data? What if you could more quickly classify documents and automatically extract the data to drive line-of-business applications and decision making across your enterprise? Many data challenges are going unsolved at today's businesses, because traditionally engineered software cannot tackle them.   .

Any Document.

- Extract data automatically from digital files and send it directly to line-of-business applications.

- Eliminate hand-keyed data, improving accuracy and saving time on document processing.

- Protect your business information and sensitive files using multiple levels of data security.

Anywhere.

- Increase efficiency and route electronic data automatically through business processes.

- Grow employee productivity and relieve manual sorting and classification of documents.

- Monitor business processes and securely access information from virtually any device.

Anytime.®

- Speed up payment processes to leverage early discounts, saving your organization money.

- Reduce the number of processes requiring rekeying of data and manual intervention.

- Utilize business processes 24/7 to optimize operations and maximize efficiency.

"Findings showed that organizations using AI-powered solutions in addition to Big Data technologies are best able to maximize their data...companies that use AI and Big Data technologies together are measurably better at turning data into information that can be used to solve business problems."

-Narrative Science

Products Driven by AI are more Efficient than Traditional Software

Artificial Intelligence is designed to effectively replace human-centric processes allowing organizations to remove manual process steps from information management. This increases the likelihood of protecting sensitive information and maintaining high standards of data accuracy.

Automate Manual Tasks

Are you still manually hand-keying information into multiple systems? Eliminate routine tasks with the PaperVision® Automation Manager 'bot'. This unattended 'bot' logs into your applications and performs tasks that were previously done by human users to eliminate manual tasks.

Reallocate Labor

What if your staff could focus on business-critical tasks instead of tedious routine tasks? Leverage the PaperVision Automation Manager and let the 'bot' do the work for you! Free your staff from boring repetition and allow them to focus on more important work, saving the entire organization money.

Integrate Seamlessly

How can you share information across multiple systems? With the PaperVision Integration Manager, it's easy. This attended 'bot' allows you to seamlessly share information between various LOB applications and PaperVision Enterprise or ImageSilo®. Productivity increases when staff no longer needs to switch between multiple systems.

Process Everything

Do you have complex documents? Leverage PaperVision® Forms Magic™ Technology and gain the ability to ingest and process both paper documents as they're being scanned as well as electronic files of many types, including virtually all image types and PDF files.

Ensure Data Accuracy

Are there often inaccuracies in your data? When you let the PaperVision Automation 'bot' handle data entry, accuracy improves dramatically. Let your 'bot' perform any number of routine tasks—from keying invoice information to researching bad addresses—the possibilities are endless.

Protect Sensitive Data

How secure is your data? Protect your sensitive data from prying eyes. When you store your data in Enterprise Content Management (ECM) systems like PaperVision Enterprise and ImageSilo, you can rest assured your data is always safe because it is protected under multiple layers of security while in transmission and at rest.

> *"The PaperVision® Forms Magic technology has revolutionized our AP processes! We've been able to cut our invoice processing times by more than 75%! We're saving the organization money and improving relationships with our business partners. We love Forms Magic!"*
