

Get More Value from SharePoint®

More is Possible with Digitech Systems

As the King of Capture for Microsoft® SharePoint, Digitech Systems is helping companies get more value out of their technology investments. Include more information in your collaborative processes with Enterprise Content Management (ECM) from Digitech Systems.

Do More with Your SharePoint Software

SharePoint is a general purpose platform that connects people with information, but it doesn't natively include sophisticated ECM functionality or simple ways to import paper documents into the system. That's where Digitech Systems' FREE tools and ECM technologies can help. Expand your SharePoint experience by simplifying document capture, promoting SharePoint adoption and increasing efficiency, control and money savings.

- Enhance collaboration by managing your paper documents in SharePoint
- Increase adoption by making it simple to send electronic files to SharePoint
- Get more sophisticated document management with comprehensive ECM

“Digitech Systems provides valuable information management capabilities that are currently missing from today's SharePoint solution. Their PaperVision Capture solution integrates directly with the SharePoint content model. No other major manufacturer in the market today offers such a tightly knit production-capable, distributed information capture solution for SharePoint.”

-Raimund Wasner, Managing Director and ECM industry analyst at Kollabria

Make better technology decisions faster

Manage Paper Documents in SharePoint with PaperVision® Capture

Paper usage is rising by about 20% every year. If you're not using SharePoint to handle paper documents, you're missing the chance to manage more information collaboratively. Feed all your information into SharePoint. PaperVision Capture makes it fast and affordable to integrate paper documents into your SharePoint system.

- Convert paper documents to a digital format for storage in SharePoint
- Quickly upload all your information—PaperVision Capture comes with a FREE SharePoint export
- Make information easy to retrieve by sending index field information, metadata or keyword search terms to SharePoint
- Organize everything—PaperVision Capture stores your documents in the correct SharePoint library

Send Electronic Files to SharePoint using FREE PaperVision® SharePoint Tools

Many companies are struggling to get their employees to upload electronic files into SharePoint. Digitech Systems can help you increase adoption and include more critical information in your collaborative process. PaperVision SharePoint Tools are FREE, and they integrate SharePoint into employee's daily work environments, making it easy to capture files stored locally on computers scattered across the office. Download the tool now at www.digitechsystems.com/free-sharepoint-tools. No purchase necessary!

- Quickly send documents from Windows® Explorer to SharePoint—just right-click on the file and choose Send to SharePoint
- Easily print documents to SharePoint from any Windows application
- Accelerate document capture by adding multiple files at one time and by sending index field values and metadata to SharePoint
- Put new documents in the correct place by linking to content types in your SharePoint library

“Anyone struggling to copy files over to SharePoint can now do so, and the process is simple enough that any user can be tasked with a batch job. ... So, if anyone needs a handy tool to get some odd files into SharePoint, here's a free solution that does the job with minimal fuss.”

- CMS Wire in a March 2011 article “Digitech Offers Free SharePoint Document Upload Tool”
